

WELCOME

About Us

Nirvighna Solutions, we are young, vibrant team making rapid strides in the most competitive Information Technology Market. The foundation of our success lies with our co-ordinate teamwork and a very clear approach towards being the best.

Our Mission

Nirvighna Solutions came into the competing Information Technology services industry with a mission to provide most efficient and economically friendly solutions to all our customers.

IT HARDWARE

Hardware is defined as my physical component of a computer system, be it a computer monitor, tablet or smartphone as well as ICs and other electronic devices. Without hardware, our computer would not exist and software could not be used. As a well-known IT integrator, we are providing hardware services and software solutions to our customers.

- Laptops
- Desktops
- Monitors
- Microsoft Surface Pro
- Apple MacBooks and iPhones and Ipads
- Printing Solutions (all type of Laser, Inkjet & MFP)
- Workstations
- Think Clients

- Servers and Server Components.
- Conference room solutions (Projectors, Projector Screen,
- Conferencing devices & Video conferencing Solutions.

IT SOFTWARE

Over the past decade, the pace of globalization has been mainly driven by rapid developments in information and communication technologies. For this reason, IT specialist are in great demand in many areas, one of which is providing software solutions for businesses.

- ADOBE LICENSES
- AUTOCAD LICENSES
- MICROSOFT LICENSES

IT SECURITIES

With the rise of the internet of Things (IOT) and the cloud, we are facing an increasing number of vulnerabilities to our networks. Whether you are a small startup or a large organization, security should be a top priority.

- WEB SECURITY.
- END POINT SECURITY.

DATA MANAGEMENT SOLUTIONS

Now a days most global companies are following a BPO strategy and managing non-strategic business processes. In this business environment, reliable and correct information is of the most importance.

- Server Solutions
- Network Attached Storage (NAS)

VIRTUALIZATION SOLUTIONS

Virtualization is the method of creating a virtual version of a server instead of hardware. It allows multiple operating systems to run simultaneously on one machine.

- Server Virtualization.
- Virtual Desktop Virtualization (VDI).

DATA CENTER SOLUTIONS

The data center solution defines the products and services required to create and maintain a data center. Relying on size and requirements, a company could use its own data center or share a section of a data center with multiple tenants.
